Endpoint Protector – Maintenance Update

(Version 4.4.1.1) (Remarks: Applies to Version 4.4.1.0)

Server Version: 4.4.1.1

Improvements:

- In order to prepare for the upcoming Product Update (Version 4.5.0.1) that will bring significant changes related to logs, reports and databases processing efficiency, the current Maintenance Update will ensure a smooth transition. It will reduce the time needed to apply the 4.5.0.1 Product Update, prepare the database structure and caching mechanism etc.
- The option to Enable Advanced Printer and MTP Scanning has been added. Currently available only on Windows computers, it provides an improved method of Printer and MTP Content Aware Protection File Tracing and File Shadowing. It increases accuracy and reduces false positives for file transfers via browsers (Internet Explorer, Firefox, Chrome) or Skype
